Faltschiebetüren empfehlen sich besonders bei langen Fronten, wo man im Handumdrehen den gesamten Schrankinhalt im Blick haben möchte. Damit sie sich leicht falten und schieben lassen werden leistungsstarke Spezialbeschläge eingesetzt.

Foldable sliding doors are particularly suitable for long fronts where unhindered access to the complete interior is desired. Heavy duty special fittings are used to ensure ease of folding and sliding.

Nous vous conseillons l'utilisation de portes coulissantes pliantes pour des façades particulièrement longues vous permettant ainsi d'obtenir une vue d'ensemble du contenu de l'armoire en un tour de main. Des ferrures de grande puissance spécialement conçues à cet

effet permettent de plier et de coulisser les portes sans le moindre effort.

Vouw-schuifdeurbeslag valt met name aan te bevelen bij lange kastfronten, waar men graag in een handomdraai het gehele kastinterieur wil overzien. Voor gemakkelijk vouwen en schuiven wordt robuust speciaalbeslag toegepast.

Le porte a libro scorrevoli sono consigliabili in particolare per fronti lunghe, per i casi in cui si vuole vedere in un batter d'occhio l'intero contenuto dell'armadio. Affinché si possano piegare e spingere con facilità vengono impiegate guarniture speciali particolarmente efficienti.

- ⓓ Infos Schiebetürbeschläge
- ⓖⓑ Sliding door fittings info
- ⓕ Infos Ferrures pour portes coulissantes
- ⓃⓁ Schuifdeurbeslag
- Ⓡ Info Guarniture per porte scorrevoli

Schiebetüren fügen sich oben und ggf. auch unten in zwei parallele Lauf-/Führungsprofile ein. Beim Öffnen schieben sie sich einfach hintereinander. Der Vorteil: An der Front entsteht kein Platzbedarf für sich herausklappende Türen.

Sliding doors are fitted at the top and, if necessary, also at the bottom in two parallel running tracks / guide profiles. When opening they are simply pushed behind each other. The advantage: no space required at the front for opening doors.

Les portes coulissantes s'introduisent dans deux profils de guidage parallèles par le haut, le cas échéant également par le bas. Lors de l'ouverture, elles coulisent simplement l'une derrière l'autre ce qui a pour avantage de ne nécessiter aucune place supplémentaire sur le devant lors du coulissement des portes.

Schuifdeuren lopen aan boven- en onderzijde in twee parallele geleideprofielen. Bij het openen schuiven de deuren

- (D) Produktleitsystem (NL) Product-referentiesysteem
 (GB) Product guidance system (I) Sistema di guida prodotti
 (F) Fil conducteur de produit

eenvoudig achter elkaar. Met als voordeel: aan de voorzijde blijft alle ruimte beschikbaar, omdat er geen deurtjes openklappen.

Le porte scorrevoli si inseriscono in alto ed eventualmente anche in basso in due profili di guida e scorrimento paralleli. Quando vengono aperte si spingono semplicemente una dietro l'altra. Il vantaggio: sul lato frontale non c'è bisogno di spazio per porte che si aprono verso l'esterno.
